The Digital Register may be used with Elster AMCO Water's C700 positive displacement cold water meters, sizes 5/8" - 2". This register provides a volt-free reed switch closure for a specific volume of metered water (see specifications). The actual pulse resolution and units of registration are printed on the dial plate.

Elster AMCO's Digital Register is available with either a plastic or glass lens register and can be ordered as part of the meter or as a retrofit to an existing C700 meter. Glass lens units are suited to long-term submersion (pit) applications and are supplied with 9-10 feet of 3-wire cable. Electrical connections are not polarity sensitive and are to be made using two wires connected in series to the internal reed switch and a 100 Ohm resistor (see schematic on reverse). The pulse unit requires power from an external source and is suitable for use with remote counters.
