## HIGH PERFORMANCE TURBINE METER

SIZES: 1½", 2", 3", 4", 6", 8", and 10"

## High Performance Turbine water meters

 offer some of the widest flow ranges of any turbine meters on the market.HP Turbine water meters offer some of the widest flow ranges of any turbine meters on the market.
 All HP Turbine water meters meet or exceed the latest performance and accuracy requirements of AWWA C701 and maximum continuous flow rates may be exceeded by as much as $25 \%$ for intermittent periods.

Each HP Turbine consists of a rugged, lead free, high copper alloy maincase, an AWWA Class II turbine measuring element, and a roll-sealed register. The maincase is corrosion-resistant, lightweight, and compact. Inlet and outlet connections are flanged. Strainers are available to prevent debris from entering the meter and to reduce the effects of uneven water flow due to upstream piping variations.

The unitized measuring element (UME) allows for quick, easy, in-line interchangeability. Water volume is measured accurately at all flows by a specially-designed assembly. The hydrodynamically-balanced, thrustcompensated rotor relieves pressure on the thrust bearings to minimize wear and provide sustained accuracy over an extended operating life. Direct coupling of the rotor to the gear train eliminates revenue loss due to slippage during fast starts and line surges. A calibration vane allows in-field calibration of the UME to lengthen service life and to ensure accurate registration.

The roll-sealed register eliminates leaking and fogging. A magnetic drive couples the register with the measuring element.

The HP Turbine water meter is designed for applications where flow rates are consistently moderate to high.

Adaptability to all present and future systems for flexibility.

~ $\boldsymbol{\sim}$ Roll-Sealed Register

- Magnetic drive, low-torque registration ensures accuracy
- Impact-resistant register design with flat glass for readability
- 1:1 ratio, low-flow indicator identifies leaks
- Bayonet mount allows in-line serviceability
- Tamperproof seal pin deters theft
- Date of manufacture, size, and model stamped on dial face
- Lead Free Maincase
- Made from lead free high copper alloy
- NSF/ANSI 61, Annex G certified and Annex F compliant
- Compact design is lightweight and easy to handle
- Sturdy, durable, corrosion-resistant
- Resists internal pressure stresses and external damage
- Residual value
- Turbine Measuring Element
- Excellent low-flow sensitivity and wide flow ranges available at 98.5\% 101.5\% accuracy
- Direct coupling of rotor to gear train prevents slippage and ensures accurate registration
- Interchangeable measuring element allows for in-line service
- Hydrodynamically-balanced rotor
- Reusable 0 -ring gasket on $3^{\prime \prime}-10^{\prime \prime}$ sizes

Neptune provides a limited warranty with respect to its HP Turbine water meters for performance, materials, and workmanship.

When desired, owner maintenance is easily accomplished by in-line replacement of major components.

## GUARANTEED SYSTEMS COMPATIBILITY

All HP Turbine water meters are guaranteed adaptable to our ARB $^{\circledR}$ V, ProRead ${ }^{\text {m }}$ (ARB VI), E-Coder ${ }^{\circledR}$ )R900 $i^{m}$, E-Coder ${ }^{\circledR}$, TRICON ${ }^{\circledR} / \mathrm{S}$, TRICON/E ${ }^{\oplus} 3$, and Neptune meter reading systems without removing the meter from service.

- Application: cold water measurement of flow in one direction
- Maximum operating pressure: 175 psi (1206 kPa)
- Maximum operating temperature: $80^{\circ} \mathrm{F}$
- Register: direct reading, center sweep, roll-sealed, magnetic drive with lowflow indicator
- Measuring element: AWWA Class II Turbine, hydrodynamically-balanced rotor
- Sizes: $1^{11 / 2 "}, 2^{\prime \prime}, 3^{\prime \prime}, 4^{\prime \prime}, 6^{\prime \prime}, 8^{\prime \prime}, 10^{\prime \prime}$
- Units of measure: U.S. gallons, imperial
gallons, cubic feet, cubic metres
- Register Types:
- Direct reading: Bronze box and cover (standard)
- Remote reading systems*: ARB V, ProRead, E-Coder)R900i, E-Coder, TRICON/S, TRICON/E3
- Reclaim
- Companion flanges:
- $11 / 2^{\prime \prime}$ and $2^{\prime \prime}$ (oval): bronze or cast iron
- $3^{\prime \prime}, 4^{\prime \prime}, 6$ " : bronze or cast iron
- 8 " and 10 ": cast iron
- Strainer:
- $11 / 2 "$ " $6^{\prime \prime}$ NSF/ANSI 61 lead free high copper alloy
- $11 / 2$ "-10" NSF/ANSI 61 lead free Rilsan ${ }^{\circledR}$ nylon-coated ductile iron
* Consult factory for meter performance specifications when fitted with ARB.
