

Badger Meter

Recordall® Disc and Turbo Series Meters for Reclaimed Water

Sizes 5/8...12" (DN 15...300 mm)

Applications

For use in measurement of cold water in reclaimed water distribution systems. Meters are available for residential, commercial and industrial services where flow is in one direction only.

The meter and its internal components are for use in the measurement of non-potable water only. Caution must be exercised not to mingle non-potable and potable water meters and especially their internal components.

Utility Impacts

Utilities faced with rising water costs and limited water resources are developing non-potable, reclaimed water distribution systems. Accurate, dependable metering is needed to bill customers for these alternate supplies.

Special coloring and markings are designed to distinguish potable water meters from reclaimed water meters in accordance with current industry standards. The utility must develop appropriate operational procedures to ensure that potable water meters and reclaimed water meters and their internal components are not mingled.

Warranty

Due to the lack of a uniform definition of the composition of reclaimed water, the warranties associated with reclaimed water meters are different than the potable water Recordall meter line. Please review the warranty statement for this important difference.

Specifications

5/8...2" Recordall Disc Series Meters

1-1/2...12" Recordall Turbo Series Meters

For meter specifications for each Recordall size and type meter, see the Product Data Sheet for that specific meter.

Thermoplastic shroud and lid only.

Special Markings

Local register	Lavender lid and shroud, "RECLAIMED" on dial face & non-potable water symbol on register lid
HR-E & HR-E LCD encoders	Lavender lid
Chamber assembly	Has designation for non-potable water only
Meter housings	"RCLM" etched on housings, bronze covers and bottoms
Cast iron bottoms (5/8...1" disc meters)	Lavender

Register Type

The Reclaimed water meter line supports the same types of registration and reading systems as the potable meter line.
